INSTRUCTIONS

How To Use Your Fire Directory

A map of Johnson County, with every road marked, and numbered is in the front of this directory. Please use this map when becoming familiar with the system.

The starting point for the system is the Northwest corner of Johnson County. Roads running North and South start with 10, 11, 12, 13, 14, 15, etc. Roads running East and West start with 50, 51, 52, 53, etc.

Houses are numbered so that the number in front of the house gives the complete address. For instance 52F13, the first two digits is the road the house is located on, F gives the location in section, 13 is the intersecting road to the West.

Houses on the North and East will have one of the following letters assigned:

A B C F G H J K

Houses on the South and West will have one of the following letters assigned:

L P R T U X Y Z

Please note this gives two letters for each quarter of mile. Letters always come in sequence from the North and West.

Please remember the first digits in the house number indicate the road the house is on. The last digits indicate the intersecting road to the North and West.

Roads that angle or are not on a section line are prefixed with a letter from the first half of the alphabet, namely:

A B C F G H J K

For instance road F12 is a half mile road located between road 12 and road 13. All highways are prefixed with the letter "H". Congested areas have double alphabet letters to locate them on the road. These also come in sequence from either the North or West.

Your directory lists everyone twice:

1. Alphabetical listing gives
   a. Name
   b. Address

2. Numerical listing gives
   a. Address
   b. Name
   c. Water Storage
   d. Propane
   e. Electrical master switch

Urge everyone to use his address not only for Fire - but for the doctor, ambulance, veterinary, sheriff, repair service calls, deliveries, etc.

If at any time a nyone has further questions, or more explanation is needed, please contact:
